Education

Vellore Institute Of Technology

Bachelor of Technology in Information Technology

2020 – 2024

C.G.P.A. 9.19

Experience

Societe Generale

Software Engineer

October 2024 – Present

Bangalore, Karnataka

- Integrated OAuth for authentication and authorization, increasing system security by **47%** and enabling seamless access control for over **2,000** users.
- Successfully deployed the solution into production, ensuring **zero downtime** during deployment and achieving **98%** system uptime post-launch.

Societe Generale

Software Engineer Intern

February 2024 – August 2024

Bangalore, Karnataka

- Using XPath driven XML automation saves **3 hrs** daily, reducing **90%** manual effort.
- Built robust REST APIs using Spring Boot and JPA to perform CRUD operations and queries on the PostgreSQL database to store and fetch extracted XML data.

Accenture

AEH Summer Intern

June 2023 – July 2023

Remote, india

- Researched cybersecurity regulations for **10+** European countries, providing actionable insights to strengthen compliance frameworks.
- Delved into global automotive regulations for comprehensive industry insights.

Projects

Donate4Change -A transparent and tamper-proof NGO Donation System | *Ether.js, Polybase*

March 2023

- Configured **2 smart contracts** on the Scroll Network for automated donations, integrated with a React-based frontend using Ether.js for seamless blockchain interactions.
- Used Polybase for secure data storage, enabling reliable management of donation records.

ClearVote | *Web3.js, Arcana*

February 2023

- Developed a secure smart contract in Solidity to ensure a **100%** tamper-proof voting process.
- Integrated the smart contract with a website using Web3.js, facilitating smooth interaction.
- Utilized Arcana for authentication, supporting **6** social login providers to enhance accessibility and streamline the login process.

Atlas | *Kotlin*

December 2022

- Achieved **1,000+** downloads by 2024, assisting students with **100+** curated resources and university insights.
- Developed using MVVM architecture in Kotlin, reducing code redundancy by **50%** and improving maintainability.
- Integrated Retrofit for handling **10+** API endpoints, and enhanced UI design with Lottie animations and Chip Navigation elements for a seamless user experience.

AWARDS

- Newbie Award @Societe Generale:** Recognized for delivering **30%** more effective solutions by directly understanding user requirements, ensuring **100%** on-time deliverables, and contributing to multiple projects from day 1.
- Bounties @Scaling Ethereum, ETH Global:** Won bounties in Polybase and Scroll Network for Donate4Change.
- Bounties @EthForAll, Devfolio:** Won bounty in Arcana Network for ClearVote.

Technical Skills

Programming Languages: C++, Java, MySQL, Kotlin, Solidity

Backend Framework: Springboot, JPA/Hibernate, REST API

Storage: PostgreSQL, Polybase

Frontend Framework: React, Angular

DevOps: Jenkins, Docker, Kubernetes

Other technical skills: Data Structures and algorithms, Git, RESTful API, Operating System, OAuth, XML Automation, Microservices Architecture
